

GTS SPORT SERIES

Ideal for any application where root development requires encouragement

Starter is ideal for any application where root development requires encouragement. Post renovation, spring fertilising, sprigging or laying new turf are all ideal times to use Starter. This product offers upfront phosphorous, and 50% of the nitrogen as Gal-XE ONE™.

APPLICATION RATE

200Kg – 300Kg/ha

GAL-Xe ONE™

THE GOLD STANDARD OF FERTILISER PERFORMANCE

PATENTED TECHNOLOGY DEVELOPED WITH NASA

The Gal-XE ONE™ controlled release technology used in the GTS Sports Series sustains turfgrass growth and colour. The precise metering of nutrition lasts for up to 120 days, resulting in fewer applications throughout the season.

Simplot GAL-Xe ONE™ has a patented polymer coating to effectively control nutrient release over an extended period. This exacting, controlled-release technology delivers gradual release of plant nutrients to match a plant's growth cycle for 3-4 months as needed. It improves efficiency, limits plant damage and reduces nutrient loss. The proprietary GAL-Xe ONE™ reactive layer coating was created with support from NASA's Space Alliance Technology Outreach Program.

Features & Benefits

- ✓ Controlled nutrient release for up to 120 days
- ✓ Reduced losses from volatilisation and leaching
- ✓ Reduced labour and logistics costs from fewer applications
- ✓ Incremental value from improved performance
