# SOILFORM GYPSUM

**100% Micronised Natural Gypsum Dihydrate**

**SOILFORM GYPSUM** is a highly soluble micronised natural gypsum dihydrate for amending soil profiles and correcting nutrient deficiencies.

The readily available calcium is delivered in a granular formulation that breaks down rapidly following irrigation for even particle distribution and premium soil conditioning.

## Typical Analysis (w/w)

Calcium (Ca) as Sulphate - 24%

Sulphur (S) as Sulphate - 16%

## Application Details

**For turf renovation and high cut turf areas apply at a rate of 2Kg - 10Kg / 100m<sup>2</sup>**

Use of lower rates are recommended when applying as part of a regular maintenance program.

Higher rates can be used during renovation.

Irrigate after application to dissolve the granules and to ensure even product distribution through the soil.

Contact your GTS Technical Field Agent for more application information.
