

GRANULAR DOLOMITE

18% Calcium 10% Magnesium

High analysis calcium and magnesium present in the carbonate form

2 Granule Sizes Available

Coarse Grade	Greens Grade
Suitable for fairways, sports fields and other turf areas maintained at a height of cut above 15mm	Ideal for golf greens, bowling greens and other turf areas maintained at a low height of cut.

Benefits

- Corrects pH of acidic soils
- Assists in developing strong plant cells
- Strong cell walls help resist impact of pathogens
- Corrects calcium and magnesium deficiencies in the soil

Application Rate:

500—1000Kg/Ha

To achieve the best results, apply granular dolomite after determining the nutrient requirements as a result of conducting a soil nutrient analysis.

Available in 25Kg bags
